American National assembly of The United States of America

**EMERGENCY ORDINANCE
-ANa-6D37B44E**

The Board of Assemblymen of the American National assembly of The United States of America, hereby, passes an Emergency Ordinance to outlaw any authoritative orders for a digital vaccine passport, including digital vaccine certificates, paper vaccine certificates, blockchain based or otherwise not specified that has to do with tracking vaccination status of any person(s) inhabitants, or otherwise within any county within the metes and bounds and seaward boundaries of The United States of America.

The CROWN CORPORATION, Bill and Melinda Gates Foundation, the Rockefeller Foundation, the Government of Estonia, Fondation Botnar, and the State of Kuwait or any other variation of the aforementioned Entities, have no authority to demand passports of any kind within the metes and bounds and seaward boundaries of The United States of America.

This Emergency Ordinance is being passed by reason of the proposal of the digital vaccine certificate(s) is a public emergency affecting the life, health, property, and public peace amongst individuals. The proposed digital vaccine passport is a clear violation of Human Rights.

Evidence:

“The World Health Organization has just released a guiding document for a digital vaccine certificate that will be blockchain based. This will be used to implement a vaccine passport in every country. It’s funded by the Bill and Melinda Gate’s Foundation and the Rockefeller Foundation.”

(Center for Implementation and Innovation in Health Policies), Buenos Aires, Argentina), Elizabeth Peloso (Liz Peloso Consulting Inc.), Alain Poy (WHO), Magdalena Rabini (WHO), Maria Soc (PATH), Soumya Swaminathan (WHO), Martha Velandia (WHO), Petra Wilson (Health Connect Partners), and all members and observers of the Smart Vaccination Certificate Working Group.

This work was funded by the Bill and Melinda Gates Foundation, the Government of Estonia, Fondation Botnar, the State of Kuwait, and the Rockefeller Foundation. The views of the funding bodies have not influenced the content of this document.

How digital signature verification works

6.3. Trusting a DDCC:VS signature

The cryptographic strength of private-public key pairs is based on the mathematics of asymmetric cryptography, a process involving "one-way" mathematical functions, which are operations that are easy to compute in one direction but extremely hard to reverse. They provide a high level of security provided the private key is not compromised and remains available only to the entity performing the signing. Operationally, private keys are kept highly secure and public keys are broadly shared. Provided that a private key is not compromised and unintentionally revealed to another party, content that is "signed" by (i.e. encoded with) a private key may be readily verified by (i.e. decrypted by) anyone who has the corresponding public key. Anyone using the public key associated with the private key can be confident that:

1. material they decrypt with a public key can only have been signed by the holder of the corresponding private key; and
2. the holder of the private key cannot deny that they signed the material.

PKI is the mechanism whereby the public key is circulated to all who need it and the receiver is assured that the public key comes from a trusted source. Furthermore, a PKI also includes means for revoking keys, so that if a private key is compromised, the public keys can be flagged as no longer valid.

The Board of Assemblymen passed and signed this Emergency Ordinance on the 169th day in the year of YHWH six thousand and twenty-three and the 4th day of September in the two thousand and twenty first year of the new covenant in Yahushua's name. Translation: Fourth (4th) day of September 2021.
